EXECUTIVE SUMMARY

Multidisciplinary ECE student with 3+ years of hands-on experience in AI, embedded systems, and full-stack development. Skilled in building and deploying ML-driven tools, IoT systems, and Android applications. Proficient in Python, C++, Embedded C with experience across frameworks like Flask, Firebase, Machine Learning. Passionate about innovation, automation, and solving real-world problems with scalable tech solutions.

TECHNICAL SKILLS

Programming Languages: Python, C++, C, Java, JavaScript, HTML/CSS, Embedded C

Technologies & Frameworks: Machine Learning, Artificial Intelligence, Flask, Firebase, Android Development

Data and Analytics: Data Analysis, Machine Learning, Microsoft Excel, Power BI, Google Sheets, Pandas

Tools & Platforms: Visual Studio Code, Android Studio, Google Colab, GitHub, Render, Vercel, Arduino IDE, Davinci Resolve, Figma, Canva

Hardware & Electronics: Arduino, Microcontrollers, PCB Design, IoT Systems, Embedded Systems

Additional Skills: Film Making, Music Production, Video Editing, Graphic Design, Project Management

PROJECTS

Reframe AI | Python, React, TypeScript

May 2025

- Developed a cinematic video analysis tool with scene-by-scene breakdowns for filmmakers.
- Used computer vision (OpenCV) to extract visual insights like shot composition and color palette.
- Deployed full-stack application with intuitive UI supporting MP4/MOV uploads.

Touch Verify Kiosk | Python, C++, HTML/CSS/JS

March 2025

- Created secure fingerprint-based voting system using Arduino + PC biometric integration.
- Built LCD interface and front-end UI for vote selection and confirmation.
- Developed end-to-end biometric authentication with real-time voting feedback.

Clustify - AI Customer Segmentation Tool | Python, Flask, ML, Render

February 2025

- Built ML-based customer segmentation platform with 100% classification accuracy (12 segments).
- Integrated data dashboards using Flask and deployed on Render cloud.
- Designed supervised learning pipeline for business intelligence insights.

EXPERIENCE

Chennai Metro Rail Limited

July 2025

Electronics Intern

Chennai, Tamil Nadu

- Tested and validated 20+ NCMC-compliant Automatic Fare Collection (AFC) gates, ensuring 100% interoperability with QR code and WhatsApp ticketing systems, leading to a 25% reduction in gate entry issues during pilot rollout.
- Managed stock tracking and hardware diagnostics for 50+ AFC units across 10 metro stations, increasing spare part traceability by 40% and reducing average downtime per gate by 30%.
- Monitored live metro operations at the Operation Control Centre (OCC), analyzing train-driver communication, routing logic, and system alerts across a network of 10+ trains, contributing to process documentation and fault response optimization.

Camware Technologies LLP

June 2025

PCB Assembly Intern

Chennai, Tamil Nadu

- Assembled THT & SMD boards with 90%+ error-free production rate.
- Practiced ESD-safe soldering and quality control on stabilizer PCBs.
- Learned electronics testing and production workflows.

Altruisty <i>Machine Learning Intern</i>	Dec 2024 – Feb 2025 Chennai, Tamil Nadu
	- Built automation scripts for AI tools using Python and TensorFlow. - Developed Clustify, achieving 100% ML accuracy and real-time deployment. - Implemented chatbots and API automation, improving user engagement by 30%.
Panimalar Engineering College <i>PCB Trainer (Workshop Lead)</i>	Mar 2025 – Present Chennai, Tamil Nadu
	- Taught PCB design and development to 25+ students via hands-on sessions. - Coordinated with faculty to deliver structured, practical content.
Chennai Kulfi <i>Tech & Business Associate (Part-time)</i>	Apr 2021 – Present Chennai, Tamil Nadu
	- Automated internal ops and built Android tools, improving efficiency by 40%. - Managed B2B outreach, retail setups, and event sales execution.

EDUCATION

Panimalar Engineering College <i>Bachelor of Engineering in Electronics and Communication Engineering</i>	September 2023 – May 2027 Chennai, Tamil Nadu
---	---

CERTIFICATIONS

Data Acquisition Certification by FutureSkills Prime NASSCOM	May 2024
PCB Debugging and Rework Certification by TANSAM and Flex	January 2025
Tata Data Visualisation: Empowering Business with Effective Insights Job by TCS	June 2025
Oracle Certified Generative AI Proefession by Oracle	July 2024

ACHIEVEMENTS

3rd Place – PECTEAM’24 (Poster Presentation) – Panimalar Engineering College	March 2024
1st Place – SBOANZA’22 (Short Film: "Meendum Meenduma") – SBOA School	October 2022

LEADERSHIP EXPERIENCE

IoT Value-Added Course <i>Instructor (50 Students)</i>	July 2025 Panimalar Engineering College
- Organized and taught a 3-day IoT fundamentals course to 50 batchmates, covering sensors, Arduino, and web integration. - Demonstrated real-time projects and guided hands-on sessions; session was applauded by HoD during live visit.	
Fruenza’25 Symposium <i>Overall Event Coordinator</i>	Feb 2025 Panimalar Engineering College
- Led 15-member team to host technical symposium for 200+ participants. - Handled planning, logistics, vendor coordination, and event operations.	
PCB Design Workshop <i>Workshop Trainer (25+ Students)</i>	Mar 2025 Panimalar Engineering College
- Conducted 2-day hands-on PCB workshop for 25+ peers, covering schematic design, photolithography, etching, and soldering. - Received 95% satisfaction score from attendees; appreciated by HoD for practical depth and clarity.
